-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 are drawn to a command controller to collect data signals and to drive/control the signals for a lighting system, classified in class 340, subclass 815.67.
- II. Claims 25-37 are drawn to a structure of an optical device, classified in class 362, subclass 558.
- III. Claims 38-42 are drawn to an integrated circuit for LEDs, classified in class 372, subclass 30.

1. Inventions I, II and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed in invention I does not require the particulars of the subcombinations as claimed in inventions II or III for patentability, and (2) that each subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in the invention I does not require optical diffuser as claimed in the inventions II or an integrated circuit LEDs receives address in the data signal as required in the invention III while the integrated circuit for LEDs in the invention II does not require a substrate for supporting LED at different wavelength emission as required in the invention I and II. The optical diffuser member in the invention II has separate utility such as providing transmitting/reflecting/conducting any light source interact with it while the integrated circuit LED driver in the invention III can be utilized by any control system such as telephone system.

2. Because these inventions are distinct for the reasons given above and the search required for each group of the inventions is different from each other, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 2821

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
